#FlexibilityMatters – Perfect storage with Dexion!

LogiMAT 2025 - Flexible storage solutions for future-proof intralogistics

Intralogistics is undergoing a transformation: a shortage of skilled workers, volatile markets and new regulations are presenting companies with major challenges. At LogiMAT in Stuttgart, from 11-13 March 2025 in Hall 3, Stand 3C35, Dexion will be presenting tried and tested solutions for efficient and future-proof intralogistics.

The Dexion portfolio includes scalable storage solutions for the optimal utilisation of existing storage space. With its storage systems, Dexion offers medium-sized companies planning security, high product quality and reliable service, enabling them to react flexibly to changing markets and business models.

The highlights at the exhibition stand:

Dexion's **MOVO mobile pallet racking system** maximises storage capacity by up to 80% while taking up 50% less space than conventional pallet racking. It offers 100% access to every pallet and is suitable for all goods stored. The mobile racking system comes into its own in cold and deep-freeze warehouses. It can be operated either by remote control or manually. Integrated safety features protect warehouse employees.

Innovative pallet **pull-out units** are particularly versatile in use. The right pull-out for every application, electrically extendable or with manual operation, available in different pull-out lengths with a wide range of accessories. Ergonomic order picking directly from the pallet with loads of up to 1000 kg.

TELEKANT cantilever rack

Flexible storage of long goods, saving up to 80% of valuable storage and traffic area. This is easily done with the TELEKANT cantilever rack, with flexibly extendable cantilevers and crane handling. There is no need for wide aisles for operating devices, and picking is carried out efficiently and safely in one-man operation.

GonvaLift: compact storage and picking of small parts in a single system.

With a combined solution consisting of the GonvaLift storage lift and a shelving rack, we present a partially automated batch picking application.

Connect the storage lift to your ERP or WMS and take the next step towards digitalised inventory management with more efficient processes.

Hi280 shelving rack system:

Efficient storage of small parts, storage boxes, cartons and bulky goods. The galvanised Hi280 shelving system grows with your requirements and can be installed as a single rack or as a space-saving multi-level system with an integrated storage platform. Accessories allow you to adapt the shelving system to your warehouse logistics.

Storage solutions for key challenges:

- Efficient use of space through compact systems
- Ergonomic workplace design
- Sustainable and reliable storage technology with reduced energy consumption
- Scalable systems for more flexibility and resilience

Dexion's range of services extends from planning and installation to service and after-sales service – all from a single source!

Visit us in Hall 3, Stand 3C35. #FlexibilityMatters – The right storage.

About us

The brands

Gonvarri Material Handling (GMH)

Gonvarri Material Handling is one of the leading manufacturers and suppliers of innovative, high-quality intralogistics solutions.

Gonvarri Material Handling manufactures and markets its products worldwide under the Dexion, Constructor, Kasten, Stålteknik and Kredit brands. As an established group of companies, we have decades of experience and know-how in warehouse logistics.

Dexion

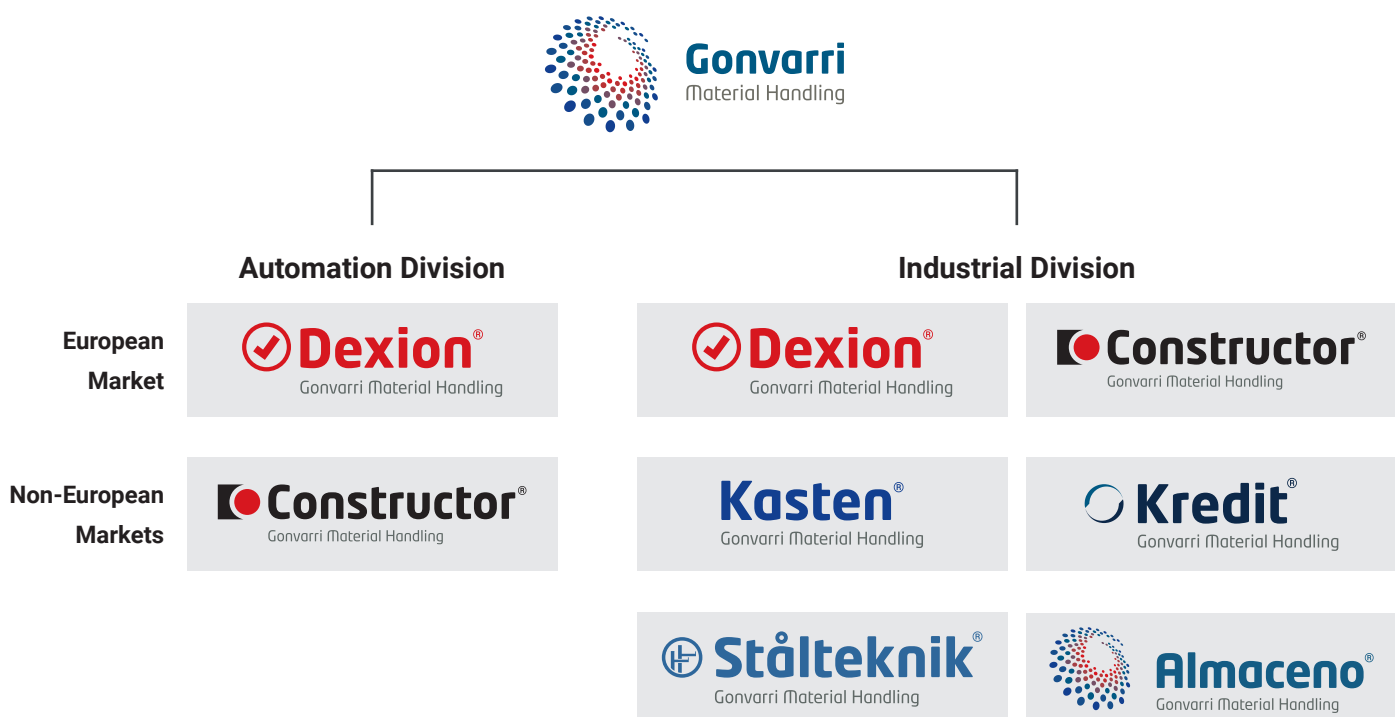

Dexion is one of the leading suppliers of industrial storage solutions and racking systems.

We develop, produce and supply customised storage solutions. We serve our customers in 18 European countries through direct sales.

In addition, we offer our products in over 50 countries, together with our partners, through a comprehensive dealer network.

We supply up to 30,000 customers annually, 80% of whom are already regular customers.

Brand structure

GMH management team

Sergio Rodriguez Cuesta

Chief Executive Officer (CEO)

Sergio Rodriguez Cuesta completed a masters in Innovation and Business Management at the University of Oviedo Spain while finishing his PhD in Electronic, Electrical and Computer Engineering. Sergio started his career working as a research engineer. In 2009 he started working for Gonvarri Industries in business development finally becoming the General Manager for Central Europe. He's been the CEO of GMH since January 2021.

Gerhard Schwager

Managing Director Dexion Germany & Chief Operating Officer (COO)

Gerhard Schwager studied business administration / business informatics at the Technical University of Berlin. After graduating with a degree in business administration, he started his career at Unilever. Further positions followed as Head of Procurement and Corporate Operations at HT Troplast and COO of the Profine Group. Since 2016, he has been COO of GMH and Managing Director of Dexion GmbH Laubach.

Products

Heavy-duty mobile pallet racking MOVO

MOVO Mobile Racking:
Increase your warehouse
capacity up to 80%.
We tell you how!

The MOVO mobile racking system is a mobile pallet racking solution. Compared to conventional pallet racking, the system can double the capacity of your existing warehouse.

The MOVO system consists of pallet or cantilever racks that are mounted on sturdy mobile carriages and move along rails that are anchored to the floor. Racks up to 15 metres high and with a maximum bay load of 30 tonnes can be realised. The sophisticated control concept with the latest sensor technology offers user-friendliness and absolute safety.

Advantages at a glance:

- Space savings of up to 50% compared to conventional pallet racks
- Increase in storage capacity of over 80%
- Lower energy and operating costs
- 100% access to every pallet
- Operational reliability down to -30°C, optionally down to -40°C, ideal for cold and deep-freeze storage
- The latest PLC technology to support optional functions; touch screen with graphic display for optimal visualisation
- Design and safety in accordance with the CE guideline 2006/42/EC and DIN EN 15095

Products

Telekant Cantilever Racks

Efficient long goods storage with crane handling

Flexible storage of long goods, saving up to 80% of valuable storage and traffic area. This is easily done with the TELEKANT cantilever rack, with flexibly extendable cantilevers and crane handling. There is no need for wide aisles for operating equipment, and picking is carried out efficiently and safely in one-man operation.

Advantages at a glance:

- Space-saving and access-optimized storage
- Long goods are safely stored and retrieved by crane
- Up to 80 % valuable storage and traffic space is saved by crane handling
- Individually adaptable, depending on requirements
- Ideal in areas that are difficult to access
- Short distances, can be installed directly in the production area
- Direct access to the material increases efficiency in the warehouse and in production

Products

Pull-Out Units

Ergonomic order picking, saving space and time

Pallet pull-outs from Dexion have become indispensable in modern warehouse operations. As the market leader, we know what we are talking about. Route-optimised, ergonomic, fast and safe order picking and, at the same time, maximum efficient use of existing storage space with the right pull-out unit. Our wide range of variants is unsurpassed, we have the right pull-out for every requirement.

We design and manufacture three types of pull-out units, to suit different requirements:

1. Floor mounted
2. Beam mounted
3. Upright mounted

Advantages at a glance:

- Easy access to the stored goods
- Efficient and fast picking
- Maximum ergonomics
- Maximum safety thanks to pull-out stop
- Wide range of models
- Increases storage capacity thanks to optimum space utilisation
- Cost and route reduction through storage space compression

Products

Hi280 shelving

The Hi280 shelving system is a flexible shelving system ideal for storing small parts. Made of galvanized steel, high quality and stable, constructed from the minimum number of components. The shelves can support shelf loads of up to 400 kg.

With its extensive accessories, there are almost unlimited applications.

Advantages at a glance:

- Quick, screwless assembly
- Optimum space utilisation, high storage capacity
- Clearly organised storage, quick access
- Versatile and flexible in use
- Future-proof system, can be expanded and customised at any time

Products

GonvaLift Vertical Lift System

Experience fast, efficient, and error-free picking with the GonvaLift. It offers clear small parts storage with numerous storage locations on a single level / tray. Goods are presented at an ergonomically optimal working height, ensuring comfortable operation and minimized travel times. The GonvaLift features a tray switcher that provides two trays, one behind the other, in the operating opening for even more efficient picking. It is also exceptionally safe to operate, thanks to its double light protection grid.

Advantages at a glance:

- Maximum storage capacity by using the full room height with the smallest footprint
- Optimise travel times using the 'goods to person' principle
- Error-free picking, optimal inventory control
- Easy and quick to install, modular system
- Ergonomic by providing the goods at the optimal working height
- Faster ROI
